Repeat block — This block allows the blocks held inside it to loop a specific amount of times.

Big Idea: Why would a loop be used?
If repeated once, would it consider a loop?

Comment: Repeat block number of repeat

Make deliberate error with a forever loop. Discuss the error and debug

Provide: 1) block code for students to view and repeat block code
2)
Student Prompt: 1) What event block would we use to start coding?
2) What input would we use to initiate a loop?
3. Which block(s) tell us that there is a loop in this program?
4) When do loops end or break?
5) How do we know?
6) What are the numbers of repeat?

Must answer Q:

First Draft: Make an error repeat time
